Thank you for joining us!

**Session 1, Part 1 & Part 2: Train-the-Trainer to Integrate a Culture of Care**

**Trainer:** Gill McClean & Michelle Kelsey Mitchell

---

**Getting Started:**

1. If you have any questions, please type them into the Q&A box.

2. Place a pen/pencil/paper nearby to jot down your thoughts.

3. At the end of this session, there will be a Session Quiz / Feedback Form.

Culture of Care Series

Train-the-Trainer to Integrate a Culture of Care

Part 1: Social & Emotional Learning (SEL), Educator Self-care, and Respond vs React
Introductions

Gill McClean

gill@pureedgeinc.org
Director of Professional Development & National Trainer

Michelle Kelsey Mitchell

michelle@pureedgeinc.org
Director of Partnerships & National Trainer
Who We Are

Pure Edge, Inc. (PEI) is a private operating foundation that provides direct service to organizations through professional development & strategy thought partnership.

PEI also provides grants to national organizations that advance the work of whole child development & SEL.
Engaging Activity: Mindful Minute

• Start in Seated Mountain.

• Bring your attention to the present moment. We are going to start by taking a Mindful Minute.

• Start bringing your attention to the breath, noticing its qualities (fast, slow, warm, cool, shallow, deep…).

• Continue to focus your attention on the breath, and notice how you are feeling. Just notice.
Welcoming Activity

Share which of the following images most accurately reflects your feelings right now.
Learning Objectives

- Illustrate the interconnectedness of SEL and self-care.
- Practice Breathe, Move, and Rest strategies for Self-awareness and Self-management.
- Identify CASEL competencies.
- Acquire Skills to train colleagues in SEL, evidence-based curricula.
- Explore the foundations of Emotional Regulation.
- Link "Respond vs. React" to Emotional Regulation.
- Identify curriculum related "Super Powers" for classroom, small group, and individual student implementation.
What three (3) things will we practice each time we meet?

What is the difference between a Reaction and a Response?
We will always practice

1. Self-care 🌿
2. Brain Breaks 😊
3. Modeling SEL Lesson Structure 🌈
Self-care
Breathe

Move

Rest
Engaging Activity: Anchor Breathing

1. Sit down and get comfortable.
2. Rest your hand on your chosen breathing space: tummy, chest or your nose.
3. Do your breathing and keep your attention on your breathing space.
4. When your attention wanders, gently bring it back to your breathing space.
5. Can you be mindful of your breathing for 5 breaths? For 1 minute?
Social Emotional Learning (SEL) is...

The process through which children and adults acquire and effectively apply the knowledge, attitudes, and skills necessary to understand and manage emotions, set and achieve positive goals, feel and show empathy for others, establish and maintain positive relationships, and make responsible decisions.
Social and Emotional Competencies

SELF-AWARENESS
- Identifying emotions
- Self-perception/Identity
- Recognizing strengths
- Sense of self-confidence
- Self-efficacy

SELF-MANAGEMENT
- Impulse control
- Stress management
- Self-discipline
- Self-motivation
- Perseverance
- Goal-setting
- Organizational skills

SOCIAL AWARENESS
- Perspective-taking
- Empathy
- Appreciating diversity
- Respect for others

RELATIONSHIP SKILLS
- Communication
- Social Engagement
- Relationship-building
- Teamwork

RESPONSIBLE DECISION-MAKING
- Identifying problems
- Analyzing situations
- Solving problems
- Evaluating
- Reflecting
- Ethical responsibility

©2020 Pure Edge, Inc.

www.casel.org
How is social emotional learning (SEL) connected to self-care?

**Self-awareness**
- Identifying emotions
- Self-perception/Identity
- Recognizing strengths
- Sense of self-confidence
- Self-efficacy

**Self-management**
- Impulse control
- Stress management
- Self-discipline
- Self-motivation
- Perseverance
- Goal-setting
- Organizational skills
Signature Practices to Integrate SEL:
Welcoming Activity, Engaging Activity, and Optimistic Closure

**Welcoming/Inclusion Activities** (1-9 minutes)
- Support contribution by all voices
- Set norms for respectful listening
- Create connection and belonging
- i.e. Community building, check-in

**Engaging Strategies** (1-15 minutes)
- Sense making
- Transitions
- Brain Breaks
- Intentionally build adult SEL skills
- i.e. Brain Breaks, think-ink-pair-share

**Optimistic Closure** (3-5 minutes)
- Creates momentum towards taking action
- Reflection and looking forward
- Intentional Closure
- Topic reinforcement
- i.e. Reflective questions

Source: SEL 3 Signature Practices Playbook 2019

©2020 Pure Edge, Inc.
**Engaging Activity: Breathing Ball**

1. Start in seated Mountain.
2. Take a breath in as the ball opens.
3. Breathe out as the ball closes.
4. Can you breathe in time with the breathing ball?

- This is generally a favorite and keeps the children’s attention.
- We use a Hoberman Sphere™ as a breathing ball.
- You can have children take turns leading a few rounds with the breathing ball.
- Be careful to keep fingers safe!
Engaging Activity: Sunrise/Sunset

1. Start in Mountain Pose. Take a few breaths here.
2. Inhale, reach your arms up overhead (this is Sunrise Pose).
3. As you exhale, fold forward. Put your hands on your shins, or your ankles, or maybe the floor (this is Sunset Pose).
4. Inhale all the way back up to Sunrise.
5. Exhale hands down for Mountain.
6. Repeat a few times. Notice how you feel.
Engaging Activity: Taking in the Good

1. Think of one thing from the day that you feel good about, and be specific—for example, you listened, you were more creative, you lent a helping hand, or someone smiled at you, etc.

2. Hold on to that memory for the next 30 seconds. Remember it in as much detail as you can.

3. Allow the feeling associated with the memory to sink in your mind. Act as a sponge, absorbing the memory and the feeling together.
Here are a few suggestions for when to implement Brain Breaks for grades 3-5. The suggested exercises are meant to support the educator in getting started with Brain Breaks. Once the learners are familiar, other exercises from the manual can be incorporated. Check our website, www.pureedgeinc.org, for video tutorials and access to the Brain Breaks manual.

<table>
<thead>
<tr>
<th>Arrival</th>
<th>Mindful Minute offers learners a chance to check in with themselves at the start or end of the school day.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Refocus Between</td>
<td>Bring a little movement and breathing as a break to re-energize learners. Good options are Chair Calm/Dow, Chair Twist, and Statue.</td>
</tr>
<tr>
<td>Lessons</td>
<td></td>
</tr>
<tr>
<td>Before Testing</td>
<td>Breathing exercises help relieve testing-related stress and put learners in a state of focus. Breathing Ball, Starfish, and Balloon Breathing are good ones to start with.</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>Lining Up</td>
<td>Use Mountain and Tree postures to help learners stay calm during transition to and from the classroom. Remember to focus on breathing!</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>Recess</td>
<td>Chair Sunrise Twist is a good way to help learners calm down if they have a lot of energy after they have played outside. Once they have settled down, try Even In–Even Out to build focus.</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>Create a Calming</td>
<td>Have Mind Jar and Breathing Ball available for learners to access in a quiet area. Have posture cards printed (available on <a href="http://www.pureedgeinc.org">www.pureedgeinc.org</a>) for learners to practice postures on their own.</td>
</tr>
<tr>
<td>Center</td>
<td></td>
</tr>
<tr>
<td>Departure</td>
<td>Attitude of Gratitude invites learners to remember something or someone that makes them feel thankful.</td>
</tr>

Training Manual

Here are a few suggestions for when to implement Brain Breaks for grades 6-12. The suggested exercises are meant to support the educator in getting started with Brain Breaks. Once the learners are familiar, other exercises from the manual can be incorporated. Check our website, www.pureadginc.org, for video tutorials and access to the Brain Breaks manual.

<table>
<thead>
<tr>
<th>Arrival/ Homeroom</th>
<th>Mindful Minute offers learners a chance to check in with themselves at the start of the school day. The start of the day is also a great time to incorporate Breath exercises such as Anchor Breathing or Rest exercises like Mindful Listening.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Refocus Between Classes</td>
<td>Use the breath to help settle students as they transition from one class to another. Good options to start with are Breathing Ball, Even-In, Even-Out or Belly-Heart Breath.</td>
</tr>
<tr>
<td>Break During Class</td>
<td>Bring a little movement and breathing as a break to re-energize learners during longer lessons. Chair Cat/Cow, Chair Twist, Desk Dog, Tree or Eagle work well.</td>
</tr>
<tr>
<td>Before Testing</td>
<td>Breathing exercises help relieve testing-related stress and put learners in a state of focus. Use exercises that learners are already familiar with. TakeFive, Bally Breathing, and Alternate Nostril Breathing are simple and effective choices.</td>
</tr>
<tr>
<td>Afternoon Slump</td>
<td>To re-engage sluggish learners, some breath and movement can be helpful. Chair Pose Twist and Forward Band, Standing Half Moon, and Recharge Sequence will get learners moving. Offering Guided Rest before movement when learners are tired can also re-energize them.</td>
</tr>
<tr>
<td>Departure</td>
<td>Taking in the Good and One Minute Reflection are Rest exercises designed to help learners reflect at the end of the day.</td>
</tr>
</tbody>
</table>
Featured Video

Our Breathe Library takes you through breathing techniques that will help with focus, feeling emotions and a sense of calm. Each breathing technique is modeled in 1 to 2 minute video tutorials.
Pure Power Curriculum

Grades K-5
- Unit 1 – The Power to Be Calm
- Unit 2 – Power to Tame Your Temper
- Unit 3 – Power to Laser Focus
- Unit 4 – Power to Grow and Stretch
- Unit 5 – Power to Lead with Kindness

Grades 6-12
- Unit 1 – Power to Shine
- Unit 2 – Power of Mindfulness
- Unit 3 – Power of Brain-Body Connection
- Unit 4 – Power of a Balanced Life
- Unit 5 – Tool Kit for a Balanced Life
Checking - in
Engaging Activity: Even In – Even Out

1. Start in Seated Mountain with a tall spine, relaxed shoulders, and eyes gently closed.
2. Breathe naturally through the nose.
3. We are going to focus on making our inhales and exhales even.
4. Inhale deeply through the nose and exhale through the mouth for a count of one.
5. On the next breath, let’s count to two on the inhale and the exhale.
6. Repeat, continuing to extend the breath up to a count of five.
Engaging Activity: Chair Twist

1. Sit in Seated Mountain.
2. Inhale, sit up tall.
3. Exhale, touch your right knee with your left hand and put your right hand on your hip (or the back of the chair).
4. Inhale, sit up tall.
5. Exhale, look over your right shoulder.
6. Stay still and take 3 relaxed breaths.
7. Inhale, come back to Seated Mountain.
8. Exhale, repeat to other side.

*When teaching learners, if you are facing them make sure you mirror them (e.g., use your right hand when you instruct them to use their left hand).

*If seated on the floor, start from crisscross position and follow the same directions.
Engaging Activity

Which super power would you choose?

★ Invisibility
★ Superhuman Strength
★ Flying
★ Shapeshifting
★ Super Speed

★ Super Senses
★ Telepathy
★ Telekinesis
★ Teleportation
★ Power Absorption
"The three most important aspects of learning—attention, focus, and memory—are all controlled by our emotions, not by cognition."
Reaction

Can be thought of as an unconsidered or abrupt behavior or action.¹

Often a reaction springs forth from a:

- **sudden strong emotion**, or
- **an accumulation of strong, unexpressed emotions**.

¹:Reaction | Definition of Reaction at Dictionary.com
Image Source: https://www.flaticon.com/free-icons/emotion-faces

©2020 Pure Edge, Inc.
When we feel intense emotions, we might experience **physical** clues:

- Shaking
- Heat in the face
- Tight muscles
- Rapid heartbeats
- Stomach aches
- The urge to hit, kick, or stomp
A response is thought out, calm and non-threatening.¹

- More time for reflection
- Intentional
- Weighs alternatives
- Less Charged
- Considers other and/or other outcomes.²

The stability of our emotional lives has the potential to become dysregulated due to a variety of factors, most of which are not necessarily within our control.\(^1\)

Multifaceted **physical-mental-emotional process** that can be affected by stress.

---

Stress Response

“Gas Pedal”
Sympathetic Nervous System: Fight or Flight

“Brake”
Parasympathetic Nervous System: Rest and Digest
Engaging Activity: Ocean Breathing

1. Inhale through your nose.
2. As you exhale, whisper the sound ahhh through your mouth. Repeat two or three times.
3. On the next breath, close your mouth, exhale, and send the whisper sound through your nose.
4. See if you can find the same whisper sound in the nose on the inhalation and the exhalation.

*Ocean Breath is created by lightly constricting the throat to create a hissing sound as you breathe in and out through the nose.

*If you can’t find the sound at first, just keep practicing.
Engaging Activity: Chair Pose

1. Stand in Mountain Pose with feet together.
2. Inhale and bend both knees. Reach arms overhead and look up at thumbs. Squeeze your knees together and feel your thigh muscles working.
3. Take 3-5 relaxed breaths.
4. If it is comfortable, you can press your palms together overhead.
5. Exhale, return to Mountain Pose.

*Variation: Kangaroo Pose: Hands in front of body, elbows bent. Have learners take little hops, trying to land feet in same place. This will be VERY activating.
Emotional Regulation

Learning to identify and regulate symptoms of stress, so we must also learn how to identify and regulate one’s own emotions.

Feelings, thoughts, physiological signals – heart rate and breath pattern, and nonverbal communication – such as body language & facial expression.\(^1\)
Physical Regulation

Through practices of:

- Breathe
- Move
- Rest

We learn again and again, what it feels like to move through our experiences in thoughtful, nonreactive way.
What we hope to do

Respond

Vs.

React
Adult Modeling

Kids absorb the adults' mannerisms, especially EMOTIONAL REGULATION (the ability to manage their emotions). ¹

Cadieux, Adelle, Pediatric psychologist at Helen DeVos Children's Hospital in Grand Rapids, Michigan. “Teaching children self-compassion by modeling it ourselves.”

©2020 Pure Edge, Inc.
Engaging Activity: Seated Forward Bend

1. Sit in Seated Mountain Pose with feet flat on the floor. Inhale and sit tall, making your back as long as possible.

2. Exhale, reach both feet slightly out in front of you and fold over your legs, sliding your hands down your legs towards your shins. Take 2-3 breaths here.

3. Inhale and come back up to Seated Mountain Pose.

4. Repeat as required.

*Use this move as a quick pick-me-up or to restore when energy seems to be low.*
Engaging Activity: Guided Rest / Body Scan

1. Lie down on the floor on your back. Spread your feet apart. Turn your palms up to face the ceiling and close your eyes.

2. Put your attention on your forehead. Feel your forehead relax.

3. Put your attention on your eyes. Feel your eyes relax.

4. Put your attention on your cheeks and jaw. Feel your cheeks and jaw relax.

5. Put your attention on your neck. Feel your neck relax.

6. Put your attention on your shoulders. Feel your shoulders relax. (Repeat for arms, wrists, hands, fingers.)

7. Put your attention on your chest. Feel your chest relax.

8. Put your attention on your back. Feel where your back touches the floor (or the chair).

9. Put your attention on your belly. Notice how the breath moves the belly softly up and down.

10. Put your attention on your hips. Feel your hips relax. (Repeat for legs, knees, ankles, feet, toes.)

11. Bring your awareness to your breathing and notice where you feel the breath in your body. Maybe you notice it in your nostrils. Maybe you feel it in your chest. Maybe you feel it in your belly.

12. See if you can get really quiet. Maybe you will even feel your heart beating inside your body.

13. Let learners rest in silence for a few moments.

15. Slowly start to wiggle your fingers and toes. Take a deep breath in and stretch your arms overhead. As you exhale, relax.

16. Open your eyes and slowly return to a seated position.

17. Notice how you are feeling.

Nasal Breathing

Mouth Breathing
Benefits of Nasal Breathing

- Filters dust and impurities from the air
- Warms the air to body temperature
- The diaphragm is more easily controlled, which supports the development of internal core strength
- More control over lengthening the breath (extended exhalations help activate the parasympathetic nervous system)
- Increased oxygen from nasal breath increases energy and vitality

Northwestern University. “Rhythm of breathing affects memory, fear: Breathing is not just for oxygen; it’s also linked to brain function, behavior.” ScienceDaily. ScienceDaily, 7 December 2016. www.sciencedaily.com/releases/2016/12/161207093034.htm

Engaging Activity: Even In – Even Out

1. Start in Seated Mountain with a tall spine, relaxed shoulders, and eyes gently closed.
2. Breathe naturally through the nose.
3. We are going to focus on making our inhales and exhales even.
4. Inhale deeply through the nose and exhale through the mouth for a count of one.
5. On the next breath, let's count to two on the inhale and the exhale.
6. Repeat, continuing to extend the breath up to a count of five.
Engaging Activity: Sunrise/Sunset

1. Start in Mountain Pose. Take a few breaths here.
2. Inhale, reach your arms up overhead (this is Sunrise Pose).
3. As you exhale, fold forward. Put your hands on your shins, or your ankles, or maybe the floor (this is Sunset Pose).
4. Inhale all the way back up to Sunrise.
5. Exhale hands down for Mountain.
6. Repeat a few times. Notice how you feel.
Engaging Activity: Think-Ink-Share

Where do you feel stress in your body?
Where do you feel joy in your body?
What is stress?

A physiological reaction that prepares an individual to respond to a stressor.

What is a stressor?

The stressor is usually something that threatens the well-being or homeostasis (stable equilibrium) of the individual.
Benefits

- Positive challenge
- Motivates us to take action
- Promotes well-being
- Enhances performance

Detriments

- No relief in sight
- Makes us physically sick
- Weakens immune system
- Impairs performance
Engaging Activity: Starfish Breathing or Take Five

1. Make a starfish with one hand, fingers spread wide.
2. Put the index finger from the other hand on the outer base of the thumb.
3. We are going to trace the outline of our starfish hand. Keep looking at your pointer finger while you do your breathing.
4. Inhale (finger traces to top of thumb).
5. Exhale (finger traces down the other side of thumb).
6. Repeat until you have traced the outline of the starfish hand.

*Learners are synchronizing their movement, breath, and gaze. On the inhale, index finger and eyes trace upward along a finger; on the exhale, index finger and eyes trace downward along a finger. Each upward movement is coupled with an inhale, whereas each downward movement is coupled with an exhale.

*After Starfish Breathing, you can have learners rest their hands on their chest, continuing to breathe mindfully, as they silently recall three things for which they are thankful.
Engaging Activity: Seated Forward Bend

1. Sit in Seated Mountain Pose with feet flat on the floor. Inhale and sit tall, making your back as long as possible.

2. Exhale, reach both feet slightly out in front of you and fold over your legs, sliding your hands down your legs towards your shins. Take 2-3 breaths here.

3. Inhale and come back up to Seated Mountain Pose.

4. Repeat as required.

*Use this move as a quick pick-me-up or to restore when energy seems to be low.
Impact of Stress & Trauma on the Heart

After his death, Dr. Martin Luther King Jr's autopsy found that while he was just 39 years old, he had the heart of a 60-year-old.
• Breathing effects change in the nervous system
• Sit up tall so lungs can fully expand
• Use props to make breath concrete
• Use nasal breathing (unless otherwise instructed)
Engaging Activity: Easy In, Extend Out

1. Breathe in naturally.
2. Breathe out slowly, making the exhalation longer than the inhalation.
3. Keep going, making the exhalation longer than the inhalation.
4. Notice how you feel.

*Lengthening the exhalation tends to have a calming effect on the mind and body.*
Engaging Activity: Chair Twist

1. Sit in Seated Mountain.
2. Inhale, sit up tall.
3. Exhale, touch your right knee with your left hand and put your right hand on your hip (or the back of the chair).
4. Inhale, sit up tall.
5. Exhale, look over your right shoulder.
6. Stay still and take 3 relaxed breaths.
7. Inhale, come back to Seated Mountain.
8. Exhale, repeat to other side.

*When teaching learners, if you are facing them make sure you mirror them (e.g., use your right hand when you instruct them to use their left hand).

*If seated on the floor, start from crisscross position and follow the same directions.
Allostatic load is "the wear and tear on the body," which accumulates as an individual is exposed to repeated or chronic stress.

1 in 5 adults in America experience a mental illness.

Nearly 1 in 25 (10 million) adults in America live with a serious mental illness.

Approximately 10.2 million adults have co-occurring mental health and addiction disorders.
Stress Is Contagious

Higher cortisol levels were found in students whose teachers reported high levels of stress and burnout.

Researcher Kimberly Schonert-Reichl urges educators to be aware of their own mindsets and to practice mental wellness exercises to reduce their stress levels.
Engaging Activity: Seated Figure Four

1. Begin in Seated Mountain Pose.
2. Inhale, cross the right ankle over the left thigh, just above the knee. Place the right hand on the right thigh and left hand on the right foot.
3. Exhale, fold torso forward and relax the head down. Take 2-3 breaths here.
4. If it’s easier, you can hold the legs of the chair as you fold forward.
5. Inhale, come back to Seated Mountain.
6. Switch legs and repeat on the other side.

*Use this sequence to release the back, which can get tired from sitting.*
It is essential for adults working with young children to be well physically and emotionally.

Better health enables better relationships with children, and research has long demonstrated that good relationships are crucial for children’s learning and social-emotional development.

Reflection

What is on your mind?
or
How are you feeling?
What we hope to do

Respond vs. React
Upstairs Brain – Downstairs Brain
Upstairs Brain – Downstairs Brain

Integrating upstairs downstairs strategies:

1. **CONNECT, THEN REDIRECT:** Be present with your child’s feelings, help them get into the “green zone.”

2. **Breathing** will help bring the prefrontal cortex (“upstairs brain”) back online.

3. **Move** it or lose it: Get child moving and their mood will change.
Stress Response

“Gas Pedal”
Sympathetic Nervous System:
Fight or Flight

“Brake”
Parasympathetic Nervous System:
Rest and Digest

https://www.health.harvard.edu/staying-healthy/understanding-the-stress-response
Engaging Activity: STOP

- STOP is an exercise designed to help learners practice self-regulation when they are experiencing strong emotions.

- Learners learn to go through the four steps: S-T-O-P

- It is a good idea to practice this exercise when learners are not experiencing strong emotions, so that they will be able to implement it when they are.

- The main focus is to hone learners' observation skills to help them make more mindful choices.

- When we observe, we are just noticing what we feel in our bodies, we are not saying if something is good or bad.

- For further exploration, ask learners how the quality of their breath changes when they are laughing, sobbing, anxious, frightened, angry, relaxed, surprised, or startled.

- Underscore two important features of mindfulness practice:
  1. Consistent practice—keep trying!
  2. Learn from unmindful moments, without being too harsh on yourself.

What does tension feel like in your body?
When do you feel tension in your body?
  Why is relaxation important?
  What is stress?

When do you feel exhilarated by stress?
When do you feel depleted by stress?
Can you name some wellness practices that help build resilience?
MTSS: Multi Tiered System of Support

Tier 1: Prevention
All Learners AND Educators

Tier 2: Intervention
Small Groups

Tier 3: Intervention
Individual
Engaging Activity: Attitude of Gratitude

1. Sit comfortably, and if you like you can close your eyes.
2. Think of something/someone in your life for which you are thankful, or grateful. It can be anything or anyone!
3. Take a few moments to just appreciate this thing or person.
4. Now think of another thing or person for which you are grateful.
5. Take a few moments to appreciate this thing or person.
6. Notice how you feel.

*As you introduce this exercise, you might want to model an example for learners before bringing them through the exercise.

*This is a nice exercise to take a few responses from learners after the exercise is finished.
What is your Energy Level right now?

Takeaways

- Stress impacts us physically and mentally.
- We can use the breath and body to decrease Allostatic Load.
- Kids need strategies to help them move between the upstairs and downstairs brain.
Today’s Reflection – Part 1

Self:
Choose 1 Breathe, Move, and/or Rest Brain Break to practice independently.

Online Class:
Register for your SEL curriculum account at pureedgeinc.org

Together in Class:
Identify one thing that you are already doing related to CASEL’s 3 signature practices (Welcoming Activity, Engaging activity, and Optimistic Closure).
Today’s Reflection – Part 2

Self:
Schedule a Mindful Minute every morning.

Online Class:
- Identify two breathing Brain Breaks we practiced together and implement them during your online class with students.
- Implement one at the beginning of class and one right before the end of class.

Together in Class:
Identify one Brain Break that can be used daily for stress management with your students.
Optimistic Closure: Future Me

- Take moment to write a note to your future self.
- What reminders of how you are feeling right now do you want to capture in writing?
- What message of encouragement do you want to send to yourself?
- If you want to share with us, please use the Q & A box!
Thank you for joining us!

Session 1, Part 1 & Part 2: Train-the-Trainer to Integrate a Culture of Care
Trainers: Gill McClean & Michelle Kelsey Mitchell
