Social and Emotional Learning (SEL) Competencies

- ❖ When we reflect on our existing views, assumptions, and perspectives, we employ components of two SE competencies: *self-awareness* and *social awareness*.
- ❖ Educators have control over view of self, students, school community, world, and how one acts on their perspectives.
- ❖ Educators and leaders who employ adult SE competencies are equipped to influence lasting changes to address inequities at the community, district, and State levels.

Learning Objectives

- ❖ Identify the **aspects of relationship skills**.
 - ❖ Experience **simple self-care strategies** throughout.
 - ❖ Describe SEL and its competencies with a focus on **relationship skills**.

Relationship Skills and Self-Care

Why Focus on School Stress?

In highly stressed school environments, teachers and learners pay the costs.

When teachers are highly stressed, students show lower levels of both social adjustment and academic performance.

Relationship Skills and Self-Care

Teacher Burnout

Disrupts relationships between schools and communities

Turnover happens most in poorly performing schools, leading to destabilization of low-income neighborhood schools.

Relationship Skills and Self-Care

Stress Is Contagious

Higher cortisol levels were found in students whose teachers reported high levels of stress and burnout.

Researcher **Kimberly Schonert-Reichl** urges educators to be aware of their own mindsets and to practice mental wellness exercises to reduce their stress levels.

Relationship Skills

“

When we enjoy healthy social lives, we constantly exercise our social-emotional skills. We maintain connections that feed our senses of caring and being cared for. Some studies have even shown that there is a link between friendship and longevity.

Social and Emotional Learning (SEL) Competencies

- ❖ Reexamining our perspectives on the intersections between our sense of self and how society may view us and those around us, is fundamental to creating educational equity, for two reasons:
 - ❖ It allows us to consider the world from the viewpoint of someone different from us: *do the students in my classroom have similar opportunities and experiences that I did when I was growing up? If not, why?*
 - ❖ Reexamining perspectives can lead to action. We see the world differently, which prompts us to change. *My students have had different opportunities and experiences than me – how can I address and empathize with their needs?*

Human relationships are the essential ingredient that catalyze healthy development and learning.

“The three most important
aspects of learning
–attention, focus, and memory–
are all controlled by our emotions,
not by cognition.”

Engaging Activity: Starfish Breathing or Take Five

Relationship Skills and Self-Care

- ❖ The rational part of the brain, the Prefrontal Cortex, isn't fully developed until age 25 or so.
- ❖ Adults think with the prefrontal cortex, the brain's rational part. This is the part of the brain that responds to situations with good judgment and an awareness of long-term consequences.
- ❖ Children, teens, and young adults rely on the amygdala to process information; the emotional part of the brain.

Development is malleable. We can always learn new skills, from birth through adolescence & into adulthood, because the **brain** never stops growing & changing in response to experiences & **relationships**.

Engaging Activity: Connection

Relationship Skills and Self-Care

Belonging and Performance

Stereotype Threat (Steele)

When students have questions about their belonging, they search for cues to signal whether or not they fit in and are valued by others.

Resource Allocation

Resources otherwise used to focus on learning are instead used to figure out if they belong.

Role in Achievement Gaps

Because such questions undermine performance & are more common among underrepresented groups, they contribute to gaps.

Relationship Skills and Self-Care

How to Build Belonging

1. **Normalize** - Teach students questions of belonging and difference are normal and lessen over time
2. **Express Confidence** - Communicate confidence in students' capability to meet high standards along with critical feedback,

“this draft can be improved, I believe you can do it.”

Culture of Care practices foster social and personal conditions to increase belonging.

Relationship Skills and Self-Care

Culture of Care Tenets

Culture of Care

- SEL is integrated and sustained at the school and organization levels
- Begins with recognizing the need to care for self and one another
- Fosters communication and compassion for the challenges inherent in teaching and learning
- Recognizes differences and sees them as opportunities to demonstrate respect
- Offers and draws upon the concepts and skills we teach in Pure Power sessions

Engaging Activity: Guided Rest or Body Scan

Optimistic Closure: 7 Ways to Maintain Relationships During Distance Learning

1. Try to say hello frequently.
2. Maintain your morning meeting.
3. Reimagine check-ins.
4. Try snail mail pen pals, phone pals, or virtual turn and talk.
5. Use online tools like Google Classroom to create “virtual tables” for small-group discussions
6. Consider including parents.
7. Get kids to name and process their own emotions
